

## **Getnet launches Get Code, a global developer community to foster innovation and collaboration**

*The initiative brings together technology talent on a global scale, fosters partnerships, accelerates digital creation, and expands the ecosystem of transformation*

**Madrid, Spain, 13 February 2026.**– Getnet, the leading **fintech** provider of payment solutions in **Latin America and Iberia** and part of Santander, largest bank in the euro zone and one of the largest banks in the world by market capitalization, is proud to announce the launch of *Get Code*, its official developer community designed to connect, inspire, and empower technology professionals worldwide.

With *Get Code*, developers gain access to a vibrant network where they can collaborate, share knowledge, and create innovative solutions that drive the future of digital payments. The platform offers a wide range of opportunities, from networking and content sharing at proprietary events to participating in a Hackathon and discovering new business opportunities

*“Innovative products lie at the heart of Getnet. Get Code represents our commitment to keep fostering innovation and supporting the developer ecosystem. By creating a space where talent, creativity, and technology meet, we aim to accelerate new solutions that transform the payments industry. For developers, it’s an opportunity to access valuable resources, expand their network, and gain visibility for their ideas on a global stage,” said **Daniel Flores, Head of Product at Getnet.***

Through this community, Getnet seeks to empower developers by providing tools and resources. This includes co-creation opportunities, collaboration across different industries and geographic regions, innovation-driven initiatives such as challenges, hackathons, and knowledge sharing, as well as fostering business opportunities by connecting ideas to real market needs.

Program activities will kick off in Brazil, on **February 26** with a meet-up that will mark the community’s first gathering, under the theme **“The Future of Payments Using AI.”**

The inaugural event will feature **Verifone**, an electronic payment solutions and point-of-sale (POS) services provider, and **Red Hat**, the open-source software solutions company. The meeting will bring **Caetano Altieri, CEO of Verifone**, who will share strategic insights on how artificial intelligence is transforming payment methods. Throughout the year, additional program initiatives are planned and will be announced gradually.

*“Get Code reinforces Getnet’s positioning as a global fintech connected to the future of technology. It is an initiative that brings together innovation, collaboration, and a long-term vision to drive digital transformation in the financial sector,” adds **Denis De Lutiis, Head of Marketing LATAM at Getnet.***

*Get Code* marks a significant step in Getnet’s strategy to strengthen its presence in the global tech ecosystem and to position itself as a key enabler of digital transformation in financial services.

#### **About Getnet**

Getnet is the leading fintech provider of payment solutions in Latin America and Iberia, part of Santander, largest bank in the euro zone and one of the world's largest banks by market capitalization with over 180 million customers. We offer robust, omnichannel solutions that cater to the unique needs of our customers, integrating seamlessly with existing ecosystems while delivering powerful proprietary capabilities.

Our comprehensive suite of services includes payment gateway, in-store and e-commerce acquiring, processing, fraud prevention, financial services and value-added solutions tailored to industries such as retail, food & beverage, health & beauty, and travel.

In 2025, Getnet processed over €222 billion across 9 billion transactions, serving 1.3 million clients. The company ranks as the second-largest acquirer in Latin America by number of transactions, and among the top 10 globally. Getnet operates across Brazil (as an e-commerce leader), Mexico, Chile, Argentina, Uruguay, Spain, and Portugal.

Getnet is built to serve merchants, ISVs, PayFacs, orchestrators, platforms and the next generation of commerce enablers—connecting technologies and markets through a unified, omnichannel payment experience that boosts performance and drives growth.
